About DIVR e.V.

The DIVR is an association operating on a national level that deals with the potential of XR technologies (virtual reality, augmented reality, mixed forms). The DIVR initiates events and forums to ensure the responsible implementation of XR tech in the German economy and society. Likewise, the DIVR and its partners jointly implement projects in the XR field, such as historical reconstructions or educational games. The DIVR deals with cutting-edge technology in this field and acts as a curator of knowledge and know-how.
